## **COUNTERING VIOLENCE IN THE WORLD**

Various spheres of human existence are filled with violence: political, economic, spiritual and family life. It is expressed in the wars, murders, the impaired of life, the dominion of such phenomena as anti-humanity, aggression and cruelty. Wars, riots, revolutions, executions and terror have become almost normal for the lives of people. Violence is one of the most common forms of human rights violation. Usually women, children and the elderly suffer from violence. International Research Center «Institute of Economics and Peace» published a rating of countries and states with the largest violence in 2016. 163 countries which were tested for 23 quantitative and qualitative indices joined the rating. On the scale of the peace winners were identified 3 countries: Iceland got 1<sup>st</sup> place, 2<sup>nd</sup> place-Denmark and 3<sup>rd</sup> place-Australia. Experts noted that these countries have developed a system of special measures aimed at eliminating the causes and conditions that contribute to the violence. The system of «open windows» where the neighbors could see what is happening in the house and at any threat of life or health of people would call the police. All forms of violence are criminalized in these countries as well. You can be imprisoned even for rough emotional quarrel, during which one of the opponents threatens the other one. In my opinion, the most effective way to be protected from violence is to limit the aggressor from the victim, that is, the prohibition of approaching a person of a certain distance, as well as special restraining bracelets, which, when detecting the approaching of the aggressor to his victim in order to commit violent action would discharge current, which would neutralize the aggressor. If there are any signs of violence to any person, the police have the right to set a period of prohibition on the contact of the aggressor with the victim right at the scene of such an offence the violation of which will be considered a crime, which the court will try with the fullest extent of the law. Thus, violence is a global problem around the world. And the sooner it will be eradicated from our hearts, the sooner peace and grace will flourish throughout the world that will inspire people to do good things.
